

EPOX-Z MASTIC™

Engineered for infrastructure and concrete repair EPOX-Z Mastic is an extension of EPOX-Z's cutting edge 100% solid, zero VOC technology. It is a two component concrete repair product that can rebuild spalled or cracked concrete with a tough, self-reinforced repair. The use of EPOX-Z Mastic enables the repair to be completed quickly which not only saves on downtime, but its ease of application reduces labor costs making it highly cost effective.

As a general purpose repair mortar it is excellent in repairing concrete pipe, steel pipe, joining new concrete to old, and repairing broken or cracked block or brick. It is excellent for the repair of decking as well as vertical and overhead cracks. Additionally, it can be used to bridge void areas where dissimilar materials are used.

EPOX-Z Mastic is designed to offer easy mixing and application while providing superior strength when compared to other repair products. It features a high build consistency before hardening and is suitable for knifing or troweling onto vertical and overhead surfaces.

EPOX-Mastic offers these noted advantages over other existing materials

- Cross linking allows handling within three hours
- Shore D hardness of 90
- Highly Impact resistant
- Water and Chemical resistant
- Fire Resistant
- Strong adhesion; pull values in excess of 2300 psi
- Top Coating not required
- Ease of application; high build in excess of 2 in. on vertical surface
- Application by single stage airless pump, trowel, or roller
